one feature in the region of interest in the first image and a second span of the at least one feature in the region of interest in the second image; and correlating the first span of the at least one feature and the second span of the at least one feature to determine whether a threshold span of the at least one feature has been reached, in combination with other limitations of the claims.

Per the applicants Terminal Disclaimer filled on 2/8/2006, the rejections to the claims 14-18 under the judicially created doctrine of obviousness type double patenting has been withdrawn and the claims 14-18 are allowed
